Art Unit: 3653

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1,29,30,41,43,44 and 45 are rejected under the judicially created doctrine on obviousness-type, nonstatutory double patenting as unpatentable over claims 1-3 of US Patent number 6,776,306 to Michael et al. The elements of claims 1,29,30,41,43,44 and 45 are found in the patented claims to 1-3. Note that the reference surface has three rows mentioned in claim 3. There is indicia in a first and second row to indicate the quantity of medical items in a helix. The sizes of the helixes differ. In claim 2 there is the viewing of indicia through the turns of the helix. The difference between the present application claims and the patented claims lies in that the patent includes more steps in steps e and f and is more specific. The invention of the patented claims of claims 1-3 is in effect a species of the generic invention of the application claims (1,29,30,41,43,44,45). It has been held that the generic invention is "anticipated" by the "species". See *In Re Goodman*, 29 USPQ2d 2010(Fed. Cir. 1993).

Art Unit: 3653

3. Claims 31,42 are*** objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 32-40 are allowed.

5. Applicant's remarks have been fully considered, however, in view of the obviousness-type double patenting rejection noted above, the remarks relative to the rejected claims are not deemed persuasive.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
